MOHAMED AYMANE BADIA

DATA SCIENCE & MACHINE LEARNING · FINAL-YEAR AI ENGINEERING STUDENT, EMSI MOROCCO

Phone +212 635 546 955 **Email** badiamohamedaymane@gmail.com **Location** Marrakech, Morocco

LinkedIn linkedin.com/in/mohamedaymane-badia **GitHub** github.com/BADIAMOHAMEDAYMANE

SUMMARY

Final-year AI & Data Science engineering student (5-year MEng program, EMSI Morocco) with hands-on experience delivering NLP and OCR solutions for healthcare data at a U.S. company. Strong in Python, Transformers, PyTorch and Scikit-learn, and able to take models into production web applications (Next.js, React, REST APIs). Seeking a Data Science / Machine Learning role where data becomes measurable business impact.

TECHNICAL SKILLS

Programming: Python, SQL, JavaScript, C#, PHP, Java

Machine Learning: Scikit-learn, Pandas, NumPy, supervised learning, model evaluation

Deep Learning & NLP: PyTorch, CNN, Transformers (Hugging Face), OCR, TF-IDF, NLTK

Data: Preprocessing, feature engineering, data visualization (Matplotlib), MySQL, SQL Server

Web & APIs: Next.js, React, Node.js, Express.js, Flask, REST APIs, ASP.NET Core, Laravel

Tools & Practices: Git, Docker, Streamlit, Google Colab, Postman, MVC / N-Tier architecture

PROFESSIONAL EXPERIENCE

Data Science & Software Development Intern

Jul 2026 – Sep 2026

Lama Healthcare — Las Vegas, NV, USA

- Built and fine-tuned **Transformer-based NLP models** to classify clinical text and extract structured information from medical documents such as prescriptions and physician reports.
- Engineered an end-to-end **OCR pipeline** that turned scanned medical records into machine-readable, analysis-ready data, replacing a previously manual data-entry step.
- Shipped **Next.js / React** interfaces enabling internal teams to review, validate and visualize model outputs, wired to existing internal systems through REST APIs.
- Handled sensitive health data under strict confidentiality and data-quality standards while collaborating daily with an English-speaking U.S. team.

Tech stack: Python, Hugging Face Transformers, OCR, NLP, Pandas, REST APIs, Next.js, React, Git.

EDUCATION

MEng, Artificial Intelligence & Data Science

2022 – 2027

EMSI – Moroccan School of Engineering Sciences — Morocco · 5-year engineering degree (M.S. equivalent) · Coursework: machine learning, deep learning, NLP, databases, software engineering

PROJECTS

CIFAR-10 CNN Image Classifier · Deep Learning — **PyTorch · Streamlit · Docker**

- Designed and trained a CNN (Conv2D, BatchNorm, Dropout) reaching **~78% accuracy** on the 10-class CIFAR-10 benchmark on a Tesla T4 GPU, then deployed it as an interactive Streamlit app containerized with Docker.

News Text Classification · NLP / Machine Learning — **Scikit-learn · NLTK · Pandas**

- Built a complete NLP pipeline: tokenization, stop-word removal and TF-IDF vectorization, then trained and benchmarked multiple supervised classifiers to select the best-performing model.

Data Analysis & Visualization (Pandas, NumPy, Matplotlib) — explored and preprocessed real-world datasets, produced visual reports and trained supervised regression and classification models.

Software engineering projects — Flight Management System (React, Node.js/Express, Flask, MySQL) — full-stack app with REST API and React front end. **Car Rental Management System** (ASP.NET Core MVC, C#, SQL Server, EF Core) — N-Tier architecture with admin dashboard. **Costume Management System** (Laravel, PHP, MySQL) — RESTful API secured with JWT / Laravel Sanctum. **Quiz Generator** (Java, JavaFX, MVC) — desktop app with real-time scoring.

CERTIFICATIONS & LANGUAGES

Certification: Software Design & Project Management — Coursera

Languages: Arabic (native) · French (bilingual) · English (professional, C1) · German (basic, A2)
